CRABYON FIBER

Antibacterial function

The antibacterial function of this fibre remains unaltered till the destruction of the product.

Recommended for sensitive and weak skin

Crabyon helps in preventing dehydration of skin because its capacity to maintain the level of humidity is greater than any other cellulose fibre. At the same time it has a velour layer and does not irritate the skin.

Activation of natural responses

Chitine, which constitutes Crabyon molecule with cellulose, is known and used long ago for the treatment of dermatitis and wounds and as adjuvant substance of the regeneration of tissues and as antihemorrhage.

Biodegradable

Crabyon fibre is totally biodegradable and in such a sense, it causes no damage to environment.
