ANTIOXIDANT ■ FIRMING ■ MOISTURIZING  
ANTIAGE EFFECT

# FARMACELL INTRODUCES ITS NEW YALURONICA LINE.

The new Yaluronica® line is the result of research conducted by Farmacell, a Calze G.T. Srl brand that has always been dedicated to designing and manufacturing highly-advanced garments for the medical and cosmetics industries. Together with the important partnerships that the company has formed with highly-regarded international partners, the technological know-how that it has acquired through its continuous investments have allowed for the development of the Yaluronica® product line, with its antioxidant, firming, moisturizing and shaping properties.

The Yaluronica® product line is the result of scientific research conducted in the cosmetic field and nanomedicine in particular. The products contain the revolutionary Meryl® Hyaluronan fibre. Thanks to the use of gold nanoparticles, this revolutionary textile is capable of continuously releasing hyaluronic acid into the skin, where it effectively penetrates into the cells.

Hyaluronic acid is a natural substance present in the skin that's capable of stimulating the production of collagen, which counteracts the ageing effect of free radicals, thus rendering the skin particularly smooth, soft and elastic.

Upon making contact with the skin, Yaluronica® products immediately begin releasing hyaluronic acid in a constant and gradual manner. In addition to the incredible anti-ageing effect, you'll notice the first results of the product's moisturizing, firming and anti-oxidant action within just a few days time. The restraining and body-moulding "Shape" effect immediately renders the body more slender and shapely.

In addition to being comfortable and highly-effective, Yaluronica® garments are designed and manufactured entirely in Italy, and feature a stylish and elegant look.

ANTI-AGING EFFECT

Items can be sold  
separately  
or together in a complete  
anti-age treatment KIT.

# THE RESULTS OF THE SCIENTIFIC TESTS\* CONDUCTED SPEAK FOR THEMSELVES:

## MOISTURIZING EFFECT\*

Increased synthesis of glycosaminoglycans (GAG) and hyaluronic acid (HA) respectively by 78% after 8h and 139% after 24h.

## FIRMING EFFECT\*

45% increase in the production of collagen type I after 24 hours of treatment and 38% increase in the production of collagen type III after 24 hours of treatment.

## ANTIOXIDANT EFFECT\*

55% reduction in the formation of Reactive Oxygen Species (ROS) on the Human Dermal Fibroblasts (HDF) after 24 hours of treatment.

NOT Treated

Yaluronica® product with Meryl® Hyaluronan

\*All the efficacy evaluation tests were performed in vitro by the certified independent laboratory LEITAT Technological Center in Barcelona (E).

### Colors

Articles: Briefs, Thong, Shorts, Leggings and Camisole.

Black Ivory Skin Anthracite Ruby Petroleum

Articles: Neck band, Arm bands and Gloves.
