FINEST THERMAL LAYER

HIGH-PERFORMANCE FIBERS

SUPERFINE
MERINO WOOL

THE FEEL GOOD MICROFIBRE
Dryarn®
BY AQUAFIL

The new thermal underwear line

We focused a lot of time and resources to develop this line of products, to get a new, innovative, and performing solutions.

The result is a product made using very **fine merino wool** in the outside layer and **performing Dryarn polyester** on the inside layer. In combination with a small % of elastic fiber, we obtain a very performing product.

This line is designed to adapt to the body **like a second skin**, keeping it warm and dry in any situation. It can be used both for indoor or outdoor activities, in winter sports but also in everyday life. It can also be very useful in **heat therapy**.

High-performance fibers

The **double layer** of fabric gives the products a better fit and increases their daily comfort.

OUTER PART IN MERINO WOOL gives to the garment **PROTECTION AND WARMTH**

Soft and elastic | Natural breathable Thermoregulating

INNER PART IN DRYARN® FIBRE makes the garment **COMFORTABLE IN CONTACT WITH SKIN**

Lightweight | Utmost breathability Dermatologically tested

The **outer part in Merino Wool** gives the garment protection and warmth, the **inner part in Dryarn® fiber** helps quickly transfer the moisture generated by the body to the

outside of the garment, leaving skin dry and thermoregulated. This combination of factors creates a microclimate and offers exceptional comfort.

LIGHT WARM

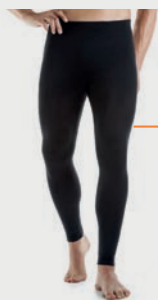

150 g/m²

-5° → +15°

150 g/m² fabric ideal as a first layer under everyday clothing or sport activities during seasons without extreme temperatures, such as autumn and spring.

It prevents changes in temperature caused by sudden changes in the climate typical of the middle seasons.

EXTRA WARM
250 g/m²

-15° → +5°

250 g/m² fabric ideal as a first layer during winter seasons characterised by intense cold and when staying outdoors at low temperatures. Suitable for those who play sports for long periods at cold temperatures, for those who do outdoor work and for anyone needing heat therapy for muscle or joint pain.

FINEST THERMAL LAYER

Final results

An extremely high-performance product to give **comfort** and freedom of **movement** to all those who work and practice sport outdoors

Excellent adhesion

Thanks to the small elastic component, the shirts conform softly and comfortably to the body.

Absolute comfort

Seamless fabric ensures total comfort and freedom of movement.

Total practicality

The garment can be worn like a second skin under everyday clothing and for sport activities, making it possible to use thinner, less heavy layers.

Thermal protection

Double layer of fabric - Lana Merino on the outside and Dryarn® fibre on the inside.

Thermoregulating function

Dryarn® fabric quickly transfers the moisture generated by the body to the outside of the garment, leaving skin dry and thermoregulated.

High-performance materials

Use of specific materials for easy washing and rapid drying.

Dermatologically tested

Ideal for continuous contact with skin for hours on end.

Thin

Ultra lightweight fabric.
